

English translation of RFI's Press Release 7 December 2020

The severe bad weather in Italy is creating inconvenience to rail traffic, especially in the North-East

On the **Brenner-Bolzano** line, traffic is **suspended** in the **Bronzolo - Brennero** and **Bolzano-Ponte Adige** sections due to adverse weather conditions that have caused landslides near the railway site.

The situation is continuously monitored by a central operations room and a crisis unit that oversee and coordinate all measures concerning circulation and information as well as assistance to travellers

For all real-time information on rail traffic and the rescheduling of the commercial offer, travellers are invited to consult the information channels of the **FS Italiane Group**
